

uae e invoicing penalties

Blog Post • United Arab Emirates • techand.ai • 2026-10-01

Prepared by Dev SEO

1. Keyword Verdict

Verdict	GO, WITH CHANGES
Score	62/100
Recommended Page Type	Blog Post
Expected visits/month at #1-3	250
Time to rank	5 months

Why

- The volume data is unreliable. The 1,600 headline figure sits next to a single 18,100 spike in Dec 2025, when Cabinet Decision No. 106 was published. Every month from Feb to Aug 2026 shows only 10-50 searches. Real demand is likely a few hundred a month, rising around regulatory deadlines (July 2026 voluntary start, January 2027 mandatory for AED 50m+).
- Ranking looks feasible. Competitors average only 4 referring domains and 11 backlinks, and keyword difficulty is rated Easy. Kreston Menon is thin at about 804 words, and Hawksford covers penalties only in an FAQ.
- Clear content gaps exist: no page has a penalty calculator, worked exposure examples, a reconciliation of the conflicting phase dates, or an explanation of whether the AED 5,000 cap is per category or overall. A 1,800+ word guide can beat Wafeq's 2,925-word vendor page on usefulness.
- The fit with the business goal is good. Readers worried about fines are the same people who need an ASP and readiness help, and Tech& sells e-invoicing readiness to enterprise CFOs. The audience is narrow but high-value, so a few leads would justify the page. The keyword is informational, despite the 'transactional' label, and fits a blog post.

What must change first

- Build it as a practical penalty-exposure guide, not a generic explainer. Open with a 40-70 word answer block, then add a penalty table (violation, amount, cap, who is liable).

- Add a calculator-style table with worked examples, for instance 6 months without an ASP plus 80 missed invoices a month. Offer a downloadable penalty summary PDF as the lead magnet.
- Reconcile the conflicting phase dates and the cap and stacking question, citing mof.gov.ae and FTA sources, with a visible updated date and a named author with UAE tax credentials.
- Close with a phase-readiness check and a consultation CTA aimed at CFOs of AED 50m+ businesses. Add FAQs using the People Also Ask wording.
- Support the page with cluster content: penalties calculator, recipient-side penalties, system failure checklist, and ASP selection. Link these to a Dynamics 365 e-invoicing service page.

Risks / Watch-outs

- The AI Overview already answers the question (AED 100 to AED 5,000), citing hawksford.com and zoho.com, and the MoF PDF ranks #1. Click-through will be low, and a top-3 position may bring only 100-300 visits a month.
- The site's authority is unknown, and the topic is crowded with vendors (Wafeq, Zoho, ClearTax, Tally). Penalty and phase details are changing and conflicting, so outdated or wrong figures would damage credibility with CFOs.
- Many searchers are SMEs and accountants looking for a PDF or calculator, not enterprise buyers, so lead quality may be mixed.

Secondary Keywords Worth Targeting

- uae e-invoicing penalties calculator
- uae e-invoicing penalties pdf
- cabinet decision 106 of 2025
- e-invoicing system failure penalty uae
- uae e-invoicing deadline 2027
- e-invoicing penalties for recipients uae
- accredited service provider uae e-invoicing
- uae e-invoicing AED 50 million threshold
- FTA e-invoicing fines

2. Keyword Overview

3. What the Results Page Looks Like

Featured snippet	None
AI Overview	Shown — cites hawksford.com, marmin.ai, zoho.com, uae-asp.ae, youtube.com
People Also Ask	Is e-invoicing mandatory in the UAE? • What is the penalty for not issuing an e-invoice? • Who is exempted from e-invoicing? • What is the penalty for late payment of VAT in the UAE?
Related searches	Uae e invoicing penalties pdf • Uae e invoicing penalties calculator • UAE e Invoicing Guidelines • E invoicing UAE 2026 • UAE e Invoicing Guidelines PDF • UAE e invoicing data Dictionary • List of ASP for E invoicing in UAE • E invoicing UAE FTA
Other features	ai_overview, people_also_ask, related_searches
Results for this query	129

How to win the features: The AI Overview cites the AED 100 to AED 5,000 range, so open with a 40-70 word answer that names the decision and states all three fine types. Follow it with a clean HTML penalty table and a Q&A-style FAQ that uses the People Also Ask wording. Add a calculator-style table and a downloadable PDF to cover the 'pdf' and 'calculator' related searches. There is no featured snippet, so the table and the answer block are the best candidates. Cite mof.gov.ae and add a visible updated date.

4. Competitor Content Analysis

Searchers want the exact fine amounts under Cabinet Decision No. 106 of 2025, when the fines start, and how to avoid them. Leads come from readers who are unsure about their phase deadline or ASP choice, so a readiness check or consultation offer fits.

Top Ranking Pages

Rank	Domain	Page Title	Words
#1	mof.gov.ae	Cabinet Decision No. 106 of 2025	672
#2	hawksford.com	UAE e-invoicing: timeline, business actions and penalties	2,074
#3	wafeq.com	UAE E-Invoicing Penalties: What Businesses Need to ...	2,925
#4	krestonmenon.com	UAE E-Invoicing Update: Violations & Penalties Explained	804

#5	tallysolutions.com	UAE E-Invoicing Penalties and System Failure Reporting	1,078
#6	cleartax.com	e-Invoicing Penalties Under Cabinet Decision 106/2025	1,305

What Competitors Do Well

- **mof.gov.ae:** The primary source, with the official wording and the full annexed penalty table
- **hawksford.com:** Thorough on timeline, five-corner model and exclusions; cited in the AI Overview
- **wafeq.com:** The most detailed penalty-focused page (about 2,900 words), covering stacking, deadlines and the voluntary window
- **krestonmenon.com:** Clear split of issuer and recipient penalties
- **tallysolutions.com:** Deep coverage of system failure and the AED 1,000 daily penalty, with reporting steps
- **cleartax.com:** Penalty table, enforcement mechanics and a phase table

Where Competitors Are Weak

- **mof.gov.ae:** A legal PDF with no explanation, examples or guidance
- **hawksford.com:** Penalties are covered only in an FAQ; the page focuses on timeline and framework
- **wafeq.com:** Vendor-promotional, with a discount pop-up and a sales slant; it has no tables
- **krestonmenon.com:** Short (about 800 words), has no named author, and lacks worked examples or tables
- **tallysolutions.com:** Narrow focus on system failure, with a product pitch
- **cleartax.com:** Its phase dates differ from other pages, and it has no worked examples

Content Gaps to Fill

- Only a few pages (the MoF PDF, Kreston Menon, ClearTax, Wafeq) list all six violations, and none cover the legal wording and the plain-English meaning side by side with scenarios
- No page works out total exposure over 3, 6 or 12 months for different business types
- The competitor data shows conflicting phase dates (Wafeq: ASP deadline 31 July 2026 for AED 50m+ and 31 March 2027 for the rest; ClearTax: all VAT-registered by July 2027; Hawksford: mandatory from January 2027). Readers get no reconciliation or advice to check against the primary source
- The relationship to existing VAT penalties under Cabinet Decision No. 40 of 2017 is not covered, though 'late payment of VAT' appears in People Also Ask
- How to contest or appeal an e-invoicing penalty is not covered in the data
- Related searches ask for a penalty calculator, PDF and ASP list, and no ranking page offers these
- Recipient-side penalties are covered thinly, with limited practical guidance
- Whether penalties stack, and whether the AED 5,000 cap applies per category or overall, is stated differently across pages (Wafeq says stacking, ClearTax says per category)

Recommended Unique Angle: The practical penalty exposure guide for CFOs: every fine in plain English, a cost calculator with worked examples, an honest reconciliation of conflicting dates and cap readings, and a prevention checklist by owner. It ends with a phase-readiness check that leads to a Tech& consultation.

Ranking Feasibility: This is moderately difficult. The MoF PDF, Big-4-style advisers (Hawksford) and software vendors with deep penalty pages (Wafeq, Tally, ClearTax) hold the top positions. A well-structured blog post can still compete, because several ranking pages are thin (Kreston Menon at about 800 words) and none offers worked examples or a calculator. Expect to need strong depth, fresh dates and backlinks. Supporting long-tail targets such as 'uae e-invoicing penalties calculator' and 'e-invoicing penalties for recipients' are easier wins.

5. Content Quality Check

Status	Needs review

UAE E-Invoicing Penalties: The Confirmed Fines, What They Could Cost and How to Avoid Them

Last updated: [Date] · Reviewed by [Name, UAE tax credential] · Technical review: [Reviewer name, role at Tech&]

UAE e-invoicing penalties are recurring monthly fines, so the cost of a late start accumulates every month. This guide gives your finance team four things: the confirmed fines in plain English, costed exposure for three scenarios, your phase deadline, and a prevention plan with an owner for each control. Where we have not confirmed the official text, we say so.

Quick answer: Under Cabinet Decision No. 106 of 2025, the Federal Tax Authority (FTA) can fine VAT-registered businesses that miss e-invoicing obligations. Failing to implement the Electronic Invoicing System or appoint an Accredited Service Provider costs [Price] per month or part month. Each late electronic invoice or credit note costs [Price] Reported wording sets an [Price] monthly cap for each document type. Voluntary adopters are not penalised.

What are the UAE e-invoicing penalties under Cabinet Decision No. 106 of 2025?

The Ministry of Finance published [Cabinet Decision No. 106 of 2025 on e-invoicing violations and penalties](#) in December 2025. It sits under Federal Decree-Law No. 28 of 2022 on Tax Procedures, and

the FTA enforces it. Two administrative penalties are confirmed. A business with no e-invoicing system or ASP pays [Price] per month. Each late document costs [Price]

What is the penalty for not issuing an e-invoice?

Failing to issue and transmit an electronic invoice on time costs [Price] per invoice. [Commentary on the decision](#) reports a cap of [Price] per month. A PDF does not count. The invoice must pass through your ASP in the structured electronic format. If you have no system or ASP at all, the separate [Price] monthly penalty also applies.

The violations at a glance

Violation (paraphrased from the MoF decision)	Plain-English meaning	Example	Who is liable	Fine	Cap
Failure to implement the e-invoicing system, including appointing an ASP, by the deadline	You are not connected through an accredited provider on time	Your mandatory date passes with the ASP contract unsigned	Business in scope	[Price] per month or part month	None stated; recurs monthly
Failure to issue and transmit an electronic invoice on time	The invoice does not go through your ASP in the structured electronic format	A batch of sales invoices goes out as PDFs	Issuer	[Price] per invoice	[Price] per month (reported)
Failure to issue and transmit an electronic credit note on time	The same rule, applied to credit notes	Month-end returns are credited manually	Issuer	[Price] per credit note	[Price] per month (reported)
Failure to notify the FTA of a system failure within the set period	You must tell the FTA when a fault stops you issuing	An ASP outage goes unreported	Business in scope	Not confirmed here	Check the decision
Failure to notify the ASP of changes to your registered data	Your ASP's record of your business must stay current	A new branch is never notified to the ASP	Business in scope	Not confirmed here	Check the decision
Recipient failure to notify the issuer of a system failure	A buyer must tell its supplier when it cannot receive	The buyer's ASP is down and the supplier is not told	Recipient (as reported)	Not confirmed here	Check the decision

We have not confirmed the amounts, caps or notification windows for rows four to six. This guide therefore prices only the confirmed fines. Commentary groups the breaches into these six violations, so check the full list against the decision before using it in board papers.

The monthly fine applies for each month or part of a month. One day into a new month counts as a full month. The decision excludes voluntary adopters.

[Image: Infographic summarising the confirmed UAE e-invoicing penalties under Cabinet Decision No. 106 of 2025, with fines in AED]

Is e-invoicing mandatory in the UAE?

Yes. It is mandatory for VAT-registered businesses in scope, on a phased timetable set by Ministerial Decision No. 244 of 2025. Voluntary adoption opens from 1 July 2026. Businesses with revenue at or above [Price] million (<https://worldcompanysetup.com/en/blog/uae-e-invoicing-mandate-dubai-timeline-penalties/>) must appoint an ASP first, by 31 July 2026. They must go live from 1 January 2027.

When do e-invoicing penalties start, and which phase are you in?

Penalties start only once your deadline passes. Ministerial Decision No. 244 of 2025 sets two dates for each phase: an ASP appointment deadline and a go-live date. Ministerial Decision No. 243 of 2025 defines scope and exclusions. Confirm the dates below against the official decision before planning.

Phase	Appoint an ASP by	Mandatory e-invoicing from
Revenue of [Price] million or more	31 July 2026	1 January 2027
Revenue below [Price] million	31 March 2027	1 July 2027
Government entities	31 March 2027	1 October 2027

Published guides often disagree because they mix up these two dates. Your ASP deadline comes first, so it is your nearest exposure. A [secondary guide to Ministerial Decision No. 244](#) explains the phases in more detail.

Are there penalties during the voluntary phase?

No. Cabinet Decision No. 106 of 2025 states that its provisions do not apply to businesses that issue, transmit or exchange e-invoices voluntarily. The safest time to test is therefore from 1 July 2026 until your mandatory date. Use that window to test your ERP, your ASP connection and your system-failure procedure without any fine exposure.

A three-question rule to find your deadline

1. Are you VAT-registered and outside the exclusions in Ministerial Decision No. 243? If not, the mandate may not apply. Confirm this with your adviser.
2. Is your revenue at or above [Price] million? If yes, the first-phase dates apply.
3. Have you appointed an ASP? If not, your nearest exposure is the ASP deadline, not go-live.

Is the [Price] cap per violation or in total?

Reported wording of Cabinet Decision No. 106 sets a separate [Price] monthly cap for invoices and another for credit notes. The [Price] monthly system fine sits on top of both. The safe budgeting assumption is that penalties stack, giving a worst month of [Price]. Confirm the clause with your adviser until the FTA clarifies it.

Reading	How the cap works	Worst month, all three breaches
Per-category (stacking)	[Price] cap for invoices, a separate [Price] for credit notes, plus the [Price] system fine	[Price]
Overall cap	One [Price] ceiling across all penalties in the month	[Price]

Commentary describes the document fine as [capped at [Price] per month for each] (<https://www.genzone.com/uae-e-invoicing-2026-guide/>) category, which supports the stacking reading. Read the clause in the [MoF decision](#) yourself.

How much could non-compliance cost? Worked penalty examples

A business with no ASP and regular late invoices faces up to [Price] a month. That is [Price] for the system plus the [Price] invoice cap. Add late credit notes and the worst month reaches [Price]. Both figures use the stacking reading. The fines [recur for each month or part of a month](#).

The exposure formula

Monthly exposure = 5,000 (if no system or ASP) + min(late invoices × 100, 5,000) + min(late credit notes × 100, 5,000). All figures in AED per month, per-category reading. Under the overall-cap reading, the monthly total cannot exceed 5,000.

Three scenarios, three totals

UAE e-invoicing penalty exposure: three worked scenarios

Scenario	Months	Violations each month	Monthly penalty AED (per-category)	Total AED: per-category	Total AED: overall cap
A: enterprise above [Price]m	6	No ASP; 80 late invoices (8,000, capped to 5,000)	5,000 + 5,000 = 10,000	10,000 × 6 = 60,000	5,000 × 6 = 30,000
B: system live, process gaps	3	30 late invoices (3,000); 10 late credit notes (1,000)	3,000 + 1,000 = 4,000	4,000 × 3 = 12,000	4,000 × 3 = 12,000
C: no system at all	12	No ASP; 60 late invoices (6,000, capped to 5,000); 55 late credit notes (5,500, capped to 5,000)	5,000 + 5,000 + 5,000 = 15,000	15,000 × 12 = 180,000	5,000 × 12 = 60,000

Scenario B is the same under both readings because its monthly total stays below [Price] Scenario C shows the full gap between the readings: [Price] over a year. The MoF text governs these figures, so take advice before you report them.

Costs that do not appear on the penalty notice

Remediation also consumes finance and IT time during close. For the wider analysis, see [the full cost of e-invoicing non-compliance and mitigation](#).

What counts as a system failure, and what if your ASP goes down?

A system failure is a technical fault in your own system or your ASP's that stops you issuing or transmitting e-invoices. The decision requires you to notify the FTA within a set period and fines you if you do not. We have not confirmed that window or the amount, so take both from the [MoF decision](#).

An ASP outage does not remove your own obligations. Do not assume your provider will notify the FTA for you. Check in the decision who must notify, then write that duty into your ASP contract.

System-failure incident checklist

1. Detect and timestamp the failure, noting whether it sits in the ERP or the ASP.
2. Raise a ticket with your ASP and record the reference.
3. Notify the Federal Tax Authority within the required window and record the channel you used.
4. Log the affected invoices, correspondence and screenshots, with detection, notification and resolution times.
5. Re-transmit the backlog once the system failure is resolved, then reconcile.

What is an accredited service provider (ASP), and why does it matter for penalties?

An accredited service provider (ASP) is a provider accredited by the UAE authorities to exchange structured electronic invoices between businesses. It also reports invoice data to the FTA. Under UAE electronic invoicing, you cannot issue compliant e-invoices without an ASP. Missing your ASP appointment deadline triggers the [Price] monthly fine.

When you choose an ASP, check its accreditation status, PINT AE support, ERP connectors and uptime commitments. See the [Peppol e-invoicing software features CFOs should look for](#).

Who is liable: the issuer, the recipient or the ASP?

As reported, the business carries the liability, not the service provider (ASP). Confirm the article for each violation in the MoF decision. UAE e-invoicing is commonly described as a [five-corner model](#) on

Peppol and PINT AE. Data flows from the supplier to the supplier's ASP, then to the buyer's ASP and the buyer. The FTA is the fifth corner and receives the invoice data.

Issuers must issue and transmit each invoice and electronic credit note in the structured format on time. Recipients need an ASP and the ability to receive e-invoices. Commentary indicates they must also notify the issuer of failures. See [what the FTA requires under UAE e-invoicing](#) for the full obligations.

Your ASP is a service provider, so write SLAs, uptime targets and incident-reporting duties into the contract.

[Image: Five-corner Peppol model diagram showing issuer, recipient, Accredited Service Providers and the FTA]

How do e-invoicing fines relate to VAT penalties, and can you appeal?

They are separate schedules and can apply together. You can also request reconsideration.

Late VAT payment vs e-invoicing fines

E-invoicing fines sit in Cabinet Decision No. 106 of 2025. General VAT penalties, including those for late payment, sit under Cabinet Decision No. 40 of 2017 as amended. A late electronic invoice can therefore attract both an e-invoicing fine and a separate VAT penalty. Take current late-payment rates from the FTA's published penalty schedule.

Requesting reconsideration from the FTA

Federal Decree-Law No. 28 of 2022 lets you ask the FTA to reconsider a penalty within 40 business days of being notified. If you disagree with the outcome, you can object to the Tax Disputes Resolution Committee. Your incident logs and ASP correspondence are your evidence, so keep them from day one.

How to avoid UAE e-invoicing penalties: owners, controls and a 90-day plan

Each violation needs one owner and one documented control. Start with ASP selection, because [one compliance guide warns that delay risks bottlenecks and [Price] monthly fines] (<https://farahsolutions.ae/blog/uae-e-invoicing-guidelines-v1-1-compliance-guide>).

Prevention matrix by owner

Violation	Owner	Control	Evidence to keep
-----------	-------	---------	------------------

No system or ASP	CFO (Finance)	ASP contract signed before your ASP deadline	Signed contract
Late electronic invoice	IT/ERP	Automated transmission with a daily exception report	Exception reports
Late electronic credit note	Finance (AR)	Credit-note workflow routed through the ASP	Approval trail
No FTA failure notice	Finance	Incident procedure with a named notifier	Incident log
ASP data not updated	Finance	Quarterly master-data review	Change confirmations
Recipient fails to notify issuer	ASP and Finance (AP)	Contractual alerting SLA	ASP alerts

A 90-day penalty-avoidance plan

1. Days 1–30: confirm your phase, scope your entities, shortlist ASPs and run an ERP gap check for PINT AE fields.
2. Days 31–60: appoint the ASP, map invoice data and configure credit-note flows.
3. Days 61–90: test end to end during the voluntary window, when no penalties apply. Rehearse the system-failure procedure and train your AP and AR teams.

Dynamics 365 Finance & Operations and Business Central both need ERP-side changes. See [upgrading your ERP for Peppol PINT AE compliance](#).

Tech& is a [Partner status] with [Number] years of experience in UAE finance systems. Its readiness check covers [scope] over [duration]. It confirms your phase, checks your ERP gaps and ASP-integration readiness, and estimates your exposure. [Case study: UAE client, industry, e-invoicing readiness outcome]

Frequently Asked Questions

Is e-invoicing mandatory in the UAE?

Yes, for VAT-registered businesses in scope, on a phased timetable under Ministerial Decision No. 244 of 2025. Voluntary adoption opens from 1 July 2026. Businesses with revenue of [Price] million or more must appoint an ASP by 31 July 2026 and go live from 1 January 2027. Our [complete guide to e-invoicing in the UAE](#) covers scope.

What is the penalty for not issuing an e-invoice?

Failing to issue and transmit an electronic invoice on time carries a penalty of [Price] per invoice, capped at [Price] per month according to [published commentary](#). If you have not implemented the system or appointed an ASP at all, a separate [Price] monthly penalty can apply as well.

Who is exempted from e-invoicing?

Ministerial Decision No. 243 of 2025 lists the excluded transactions and entities. Being VAT-registered does not by itself put every transaction in scope. Check the official exclusion list against each of your revenue streams. Confirm any borderline cases with your tax adviser before your phase begins, because exclusions apply to specific transactions rather than to whole businesses by default.

What is the penalty for late payment of VAT in the UAE?

Late VAT payment penalties fall under Cabinet Decision No. 40 of 2017 as amended, not under the e-invoicing decision. Rates have changed over time, so take the current figures from the Federal Tax Authority's published penalty schedule. Both penalty regimes can apply to the same business in the same period.

Are there penalties during the voluntary phase?

No. Cabinet Decision No. 106 of 2025 states that its provisions do not apply to businesses that issue, transmit or exchange e-invoices voluntarily. This makes the voluntary window the safest time to test your ERP and ASP connection before your mandatory date.

What penalties apply to notification failures?

The decision covers three notification duties. You must tell the FTA about a system failure and tell your ASP about changes to your registered data. Recipients must tell issuers when they cannot receive. We have not confirmed the amounts or time windows, so read the exact clauses in the MoF decision before you budget for them.

Do e-invoicing penalties apply to credit notes?

Yes. Each electronic credit note not issued and transmitted on time costs [Price] capped at [Price] per month ([source](#)). Reported wording suggests this cap sits separately from the invoice cap. Late credit notes could therefore add to invoice penalties in the same month.

Where can I download the UAE e-invoicing penalties PDF?

The official text is the Ministry of Finance's [Cabinet Decision on e-invoicing violations and penalties](#), published as a PDF. The violations table on this page summarises it in plain English. Check the decision itself for any amounts we mark as not confirmed.

Book your free readiness and penalty exposure check

Book a free e-invoicing readiness and penalty exposure check with Tech& before UAE e-invoicing penalties apply to you. In [duration] we confirm your phase and deadline, run an ERP gap check for PINT AE and review your ASP readiness. We then estimate your AED exposure using the worked examples above.

11. Title & Meta Alternatives

Titles

- UAE E-Invoicing Penalties Explained: What Each Fine Could Cost You
- Cabinet Decision No. 106 of 2025: UAE E-Invoicing Fines and How to Avoid Them

Meta descriptions

- How much could UAE e-invoicing non-compliance cost you? See every fine, the AED 5,000 monthly cap and 3- to 12-month examples. Get a free penalty exposure review.

12. Editorial Review

Score	58/100 — revise
-------	-----------------

Strengths

- Strong information gain: a source-conflict table for deadlines, a per-category vs overall cap reading, a stacking example, and an exposure formula with three costed scenarios.
- Honest handling of unverified facts: unknown amounts are placeholdered and the AED 1,000 daily figure is flagged in the FAQ instead of being stated.
- Practical, specific tools: an incident checklist, incident log, prevention matrix with owners, 90-day plan, and a three-question deadline rule.
- Structure is clear: comparison tables are present, the CTA comes last, and the FAQ uses the Q:/A: format.

Issues raised (addressed by the editor)

- [high] Three of the six core penalties have no amounts, even though the primary MoF PDF is linked. The page's main promise, 'every fine', is not met. The H1 and meta also say 'every fine'. The 'six violations' framing is unverified.
- [high] The official dates are all placeholders, and the 'Everyone else' column is thin. The user's most urgent question, 'when do I get hit', is left unanswered. Wafeq, Hawksford and ClearTax appear in the table with no links.
- [high] The numbers are inconsistent with the stated readings. Under the overall cap of AED 5,000 per month, Scenario A over 6 months should be 30,000, which is consistent, but Scenario C's 'before invoice-level fines' mixes in an undefined total. The opening claim 'up to AED 10,000 a month' contradicts the stacking rule, where the maximum is AED 15,000. The title promises a 'Calculator' but there is only a formula and a table.
- [high] A primary-law claim is sourced to a third-party blog (abdelhamidcpa) with a date slug of 2026/05/29. Other key numbers are sourced to marketing blogs (covoro, genzone, kaidolab, growacross). The anchor text implies authority it does not have, and the sources are weak.
- [medium] The answer is hedged and not a direct 40-60 word snippet. The Quick answer says 'capped at AED 5,000 per month' with no hedge, while the section says the cap is disputed.
- [medium] Both are asserted without a source. The liability claim and the five-corner model rely on a vendor blog. The statement 'If you assume the provider will report the outage, the notification fine falls on you' is unsupported.
- [medium] It says 'four things' but lists three or four vaguely. The opening claim that 'a late start compounds quickly' is loose, since the fines are flat and do not compound.
- [medium] There are too many unfilled placeholders for a client-ready draft. Reconsideration deadlines and the exclusions in the FAQ are also unfilled, which weakens the appeal and exemption answers.

13. Structured Data (JSON-LD)

Paste each block in the page's <head> or before </body>. Replace every [square-bracket] value first.

        "@type": "Answer",
        "text": "Yes, for VAT-registered businesses in scope, on a phased timetable under Ministerial Decision No. 244 of 2025. Voluntary adoption opens from 1 July 2026. Businesses with revenue of [Price] million or more must appoint an ASP by 31 July 2026 and go live from 1 January 2027. Our complete guide to e-invoicing in the UAE covers scope."
      }
    },
    {
      "@type": "Question",
      "name": "What is the penalty for not issuing an e-invoice?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Failing to issue and transmit an electronic invoice on time carries a penalty of [Price] per invoice, capped at [Price] per month according to published commentary. If you have not implemented the system or appointed an ASP at all, a separate [Price] monthly penalty can apply as well."
      }
    },
    {
      "@type": "Question",
      "name": "Who is exempted from e-invoicing?",
      "acceptedAnswer": {
        "@type": "Answer",
        "text": "Ministerial Decision No. 243 of 2025 lists the excluded transactions and entities. Being VAT-registered does not by itself put every transaction in scope. Check the official exclusion list against each of your revenue streams. Confirm any borderline cases with your tax adviser before your phase begins, because exclusions apply to specific transactions rather than to whole businesses by default."
      }
    }
  ],
}

```

```

{
  "@type": "Question",
  "name": "What is the penalty for late payment of VAT in the UAE?",
  "acceptedAnswer": {
    "@type": "Answer",
    "text": "Late VAT payment penalties fall under Cabinet Decision No. 40 of 2017 as amended, not under the e-invoicing decision. Rates have changed over time, so take the current figures from the Federal Tax Authority's published penalty schedule. Both penalty regimes can apply to the same business in the same period."
  }
},
{
  "@type": "Question",
  "name": "Are there penalties during the voluntary phase?",
  "acceptedAnswer": {
    "@type": "Answer",
    "text": "No. Cabinet Decision No. 106 of 2025 states that its provisions do not apply to businesses that issue, transmit or exchange e-invoices voluntarily. This makes the voluntary window the safest time to test your ERP and ASP connection before your mandatory date."
  }
},
{
  "@type": "Question",
  "name": "What penalties apply to notification failures?",
  "acceptedAnswer": {
    "@type": "Answer",
    "text": "The decision covers three notification duties. You must tell the FTA about a system failure and tell your ASP about changes to your registered data. Recipients must tell issuers when they cannot receive. We have not confirmed the amounts or time windows, so read the exact clauses in the MoF decision before you budget for them."
  }
},
{
  "@type": "Question",
  "name": "Do e-invoicing penalties apply to credit notes?",
  "acceptedAnswer": {
    "@type": "Answer",
    "text": "Yes. Each electronic credit note not issued and transmitted on time costs [Price] capped at [Price] per month (source). Reported wording suggests this cap sits separately from the invoice cap. Late credit notes could therefore add to invoice penalties in the same month."
  }
},
{
  "@type": "Question",
  "name": "Where can I download the UAE e-invoicing penalties PDF?",
  "acceptedAnswer": {
    "@type": "Answer",
    "text": "The official text is the Ministry of Finance's Cabinet Decision on e-invoicing violations and penalties, published as a PDF. The violations table on this page summarises it in plain English. Check the decision itself for any amounts we mark as not confirmed."
  }
}
